Nishtha Patel

Front End Web Developer

190 Ryland St,
San Jose, 95110
np1goal@gmail.com
(669) 226-8347

EXPERIENCE

LookingBus, Palo Alto — *iOS Swift Developer*

August 2019 - January 2020

Using Swift, I worked with Google Maps and iOS MapKit for iOS mobile app. Determined user location, destination location and made API calls to get the route information between two locations. Also worked with BLE (Bluetooth Low Energy) Scanner. Scanned, Connected and Written to Bluetooth devices.

Ambii, San Jose— *AI Software Developer*

January 2018 - January 2019

Developed a recommendation system based on the PageRank Algorithm, named it Personalized PageRank algorithm. Used Node.js to make calls between different servers and databases.

Ambii, San Jose — *Software Developer*

September 2017 - December 2017

Worked on Android Studio for Android App as well as on MEAN stack for web app. Worked on UI using HTML Javascript, CSS and XML. Worked on Java and Node.js for making API calls.

Rimokon, Santa Clara — *Software Engineer Intern*

May 2017 - September 2017

The project involved developing a Java based application on an Android mobile device that uses the mobile camera with processing performed in a multithreaded manner. It contained working with Android UI in Android Studio.
